

Schreibe die Brüche als Dezimalzahl.
Berechne maximal 4 Nachkommastellen

Lösung

1) $\frac{2}{6} = \underline{\hspace{2cm}}$

$\frac{5}{4} = \underline{\hspace{2cm}}$

0,3333 / 1,25

2) $\frac{8}{8} = \underline{\hspace{2cm}}$

$\frac{7}{3} = \underline{\hspace{2cm}}$

1 / 2,3333

3) $\frac{4}{5} = \underline{\hspace{2cm}}$

$\frac{2}{2} = \underline{\hspace{2cm}}$

0,8 / 1

4) $\frac{2}{11} = \underline{\hspace{2cm}}$

$\frac{6}{2} = \underline{\hspace{2cm}}$

0,1818 / 3

5) $\frac{4}{9} = \underline{\hspace{2cm}}$

$\frac{5}{5} = \underline{\hspace{2cm}}$

0,4444 / 1

6) $\frac{3}{10} = \underline{\hspace{2cm}}$

$\frac{7}{11} = \underline{\hspace{2cm}}$

0,3 / 0,6363

7) $\frac{4}{3} = \underline{\hspace{2cm}}$

$\frac{2}{8} = \underline{\hspace{2cm}}$

1,3333 / 0,25

8) $\frac{11}{8} = \underline{\hspace{2cm}}$

$\frac{8}{10} = \underline{\hspace{2cm}}$

1,375 / 0,8

9) $\frac{2}{3} = \underline{\hspace{2cm}}$

$\frac{11}{3} = \underline{\hspace{2cm}}$

0,6666 / 3,6666

10) $\frac{7}{13} = \underline{\hspace{2cm}}$

$\frac{6}{10} = \underline{\hspace{2cm}}$

0,5384 / 0,6

11) $\frac{6}{4} = \underline{\hspace{2cm}}$

$\frac{9}{3} = \underline{\hspace{2cm}}$

1,5 / 3

12) $\frac{9}{8} = \underline{\hspace{2cm}}$

$\frac{12}{15} = \underline{\hspace{2cm}}$

1,125 / 0,8

13) $\frac{6}{17} = \underline{\hspace{2cm}}$

$\frac{5}{8} = \underline{\hspace{2cm}}$

0,3529 / 0,625
